

On 25-28 July, our team took part in "1003 km Racing" in Palanga. It was an exciting event for both participants and spectators. We became acquainted with other teams from Lithuania, Finland and Germany, and exchanged not only experiences but also invitations to participate in similar activities abroad.

Although our achieved results were quite moderate (i.e. 9th place in the overall standings), congratulations from leaders let us realize that we achieved the greatest success, i.e. we reached the finish line. Our employees who piloted the car in the racing lacked experience in such an event.

The car was prepared by our mechanics that actually did their best because during the 4-day competition they did not even soil their hands. Great memories!
